

International Institute
of Laser Implantology

Held in English

October 25/26 2019

Dr. Gilles P. Chaumanet

graduated from the University of Nantes in 1983. He is Clinical Associate Professor at Ludes University Malta/Lugano/Dubai, Visiting Professor at Tapei Medical University, Professor A.C. at the University of Cagliari in Italy, Adjunct Professor at AALZ and visiting Professor at the University of La Plata, Buenos Aires, Argentina. He currently maintains a private practice in oral surgery and implantology in Villeneuve Loubet, France, as well as a second practice in Verona, Italy. He holds multiple mastership-level accreditations in Lasers, Periodontology, Implant Therapy, Oral Surgery, Radiology and Anatomy from various institutions of higher learning. He is currently serving as President for France of the Society for Oral Laser Applications, President for France of the Academy of Laser Education, President of International Institute of Laser Implantology, Member of the board of the International Institute of Laser Implantology, Ambassador of Global Oral Implant Academy, and is an active member of CENALOS, the French Society of Medical Lasers, International Academy of Periodontology, Italian Society of Oral Surgery, AGLZ Academy, International Congress of Oral Implantologists as well as participant and contributor to many different scientific committees and societies. He is researcher and author of different articles in international publications on topics like Laser, Oral surgery or dental implants.

**Laser Implant on the French Riviera, France
2-Days Minimally Laser Implantology Seminar**

Who should attend

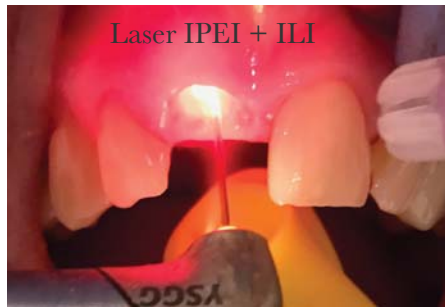

Implantologists, periodontologists or Laser dentists considering a new approach of developing their speciality. Minimally Invasive dentistry become more and more popular among the professionals and many want now to have to offer this option to their patients. At the end of the seminar you will be able to minimally invasive extract the teeth (even infected), laser disinfect, place the implant and eventually immediately load it with provisionals (single or all-on-6 restorations) without the use of any biomaterials but the magnification of the original GBR concept.

Course Overview

This course is dedicated to intermediate to Advanced laser user to show how to manage all implant cases with the use of lasers.

Minimally Invasive Implant procedures including Flapless single or multiple implant placement, Immediate post-extractional implant, Flapless Summers internal sinus-lift, GBR process and Perimplantitis treatment will be developed. Respect to patient opportunity, one or more cases will be treated under Live Surgery.

The course will unveil the flapless minimally invasive procedure utilizing 2 wavelength family lasers to assure the debridement, the decortication, the disinfection and the photobiomodulation of the surgical site. We will explain how we can avoid the use of biomaterials or complicated pre-implant procedures in most of the cases such as sinus-lift or lack of bone in situation like slim bone ridges.

International Institute
of Laser Implantology

About

The International Institute of Laser Implantology is located in Villeneuve Loubet facing the mediterranean sea between Cannes and Nice.
