Raising the Bar in Endodontic Education and Treatment

Dr. Nguyen or "Win" provides the experience and credentials one can count on. He earned his bachelor's degree in Dental Sciences in 1997 from the Catholic University of Louvain, in Brussels, Belgium. He subsequently earned his Certificate in Clinical Endodontics and Master of Science in Dentistry degree in 2001 from Case Western Reserve University in Cleveland, OH. Dr. Nguyen was a full-time Assistant Professor in the Department of Endodontics at the University of Maryland from 2001 to 2004 and at the Oregon Health and Science University from 2004 to 2008. Dr. Nguyen is the founder of Polaris Dental Specialists and the Love All Foundation. He currently practices at Polaris Dental Specialists, a multi-specialty practice in Beaverton and Salem, OR, USA. Dr. Nguyen is a Fellow at the World Clinical Laser Institute and adjunct Professor of Endodontics at Case Western Reserve University in Cleveland, OH. He is fluent in English, French, and Vietnamese and enjoys lecturing about clinical endodontics and practice management at both national and international levels.

“This was by far the best endodontic course I have taken in my 19 years of dentistry.”

—Marc Iwahiro, DMD

**ENDODON-TRICKS AND
SURG & RESCUE**
Take the first step in the international
Root Camp educational series.

AUCKLAND
MARCH 23 - 24, 2018

www.rootcampcourses.com

WHAT IS ROOT CAMP?

Root Camp balances a didactic and hands-on approach to mastering the art of modern endodontics. This continuing education series is aimed at helping clinicians and their team enhance their ability to better serve patients with in-house endodontic care. Root Camp offers four main components:

- Endodon-tricks •Surg & Rescue •Mud Run •Endo-Surgery Retreat

ROOT CAMP COURSE OBJECTIVES

- Deliver scientifically-based, clinically-relevant, and easy-to-apply protocols
- Build a results-oriented approach to clinical endodontics
- Increase and perfect the knowledge of contemporary endodontic principles, materials, and armamentarium
- Increase the number of endodontic patients within your practice
- Keep 90% of endodontic patients “in-house” while accomplishing outstanding results*
- Increase revenue by improving case acceptance. Raise your production immediately!
- Decrease stress while heightening your patients’ satisfaction as well as your own
- Optimize treatment efficiency through streamlined protocols and synergistic teamwork to achieve a 30-minute molar endo with optimal laser disinfection
- Bring within the general dentist’s reach the basic concepts and proficiencies of non-surgical retreatment and apical surgery

*when attending the entire Root Camp series

LEARN TO USE LASER AND CBCT
*CREATE NEW REVENUE STREAMS

“ At the end of the day, whether we are general dentists or specialists, our mission is to help patients maintain their dental health.”

–**Tuong Nguyen Nguyen, BDS, MSD, FWCL**

ENDODON-TRICKS AND SURG & RESCUE

Wondering about the role of laser and 3D imaging in endodontics and how to make modern technology pay for itself? Looking for a way to be faster while increasing day-to-day quality and satisfaction? Always wanted to add endodontic retreatment and apical surgery to your skillset? Then come and learn to increase your endodontic production while lowering stress with “Endodo-tricks” and “Surg & Rescue.”

Down-to-earth, clinically-relevant, effective, and efficient endodontics like you have never been shown before. Attain ultimate profits and obtain endodontic excellence through the synergistic combination of technology, teamwork and smart scripting. Take the first steps towards keeping your endos in-house!

Endodon-tricks – learn the skills to tackle calcified molars yourself!

- Anesthesia: management of “hot teeth” and laser-assisted pain control
- Access: planning the CBCT-assisted “surgical strike” and safe access into hyper-calcified canals
- Shaping/disinfection: minimize breakage, maximize efficiency and optimize disinfection with laser
- Obturation: warm gutta-percha techniques for an outstanding 3D seal

Surg & Rescue – save the natural tooth while increasing profits!

- Case selection: saving the “natural implant” or going for the “artificial implant”?
- Retreatment: strategies and in-depth step-by-step protocols to avoid referring retreatment cases out
- Apical/crown lengthening surgery: core principles and step-by-step laser protocols in molars

CONTINUE THE ROOT CAMP SERIES

Mud Run and Endo-Surgery Retreat

Further apply training from Endodon-tricks and Surg & Rescue in the next two hands-on components of the Root Camp series: Mud Run and the Endo-Surgery Retreat.

The three–day hands-on Mud Run sessions and the two-day Endo-Surgery Retreat are designed to further familiarize each attendee with step-by-step clinical protocols and an array of systems and materials including the latest CBCT, endodontic microscope, and laser technology. This endo-version of the “Spartan Races” will build the experience and confidence of doctors and their team to consistently and proficiently reach optimal endodontic care.

SEATING IS LIMITED

Reserve your seat to an upcoming Root Camp course in a city near you! Visit us at www.rootcampcourses.com.

INCREASE REVENUE
IN THE FIRST YEAR

Day 1:
Endodon-Tricks - Non-Surgical Track. Surg & Rescue - Surgical Track
\$750

Day 1 and 2 Combo Package:
Hands-on Workshop on the second day
\$1,400

CALL NOW TO RSVP:

“ ...Dr. Nguyen provides a very enjoyable class that is easy to learn. I feel very inspired and excited when I leave at the end of each class and more confident when I tackle a case. I highly recommend this class to everybody...”

–“Chip” Paluska, DMD
